

USE OF COMPUTERS AND NETWORKS

Access to the internet is available to students and teachers of the Faith School District. Online resources will allow classroom projects such as pen-pal discussions, scientific data collection, and international cultural exchanges. The internet enables worldwide connection to electronic mail, discussion groups, databases, computer software and informational sources such as libraries and museums. The goal of the district through online resources is to promote educational excellence by facilitating resource sharing, innovation and communication within our own community, our nation and worldwide.

With the access of online resources comes the availability of material that may not be considered to be of educational value in the context of the school setting. On a global network, it is impossible to control all materials and an industrious user may discover controversial information. However, it is the district's belief that the valuable information and interaction on these networks far outweigh the possibility that a user may locate material that is not consistent with the educational goals of the district.

Internet users, like traditional library users, are responsible for their actions in accessing online resources. All high school students will be informed of the Laptop Handbook procedures, policies and information at the Back to School orientation. The intention of the orientation is to educate users on proper Internet conduct. All students will sign and return the student pledge and violations will be handled according to the disciplinary matrix.

The administration will formulate the necessary regulations to carry out the policy of acceptable Internet use and the consequences if violations occur.
